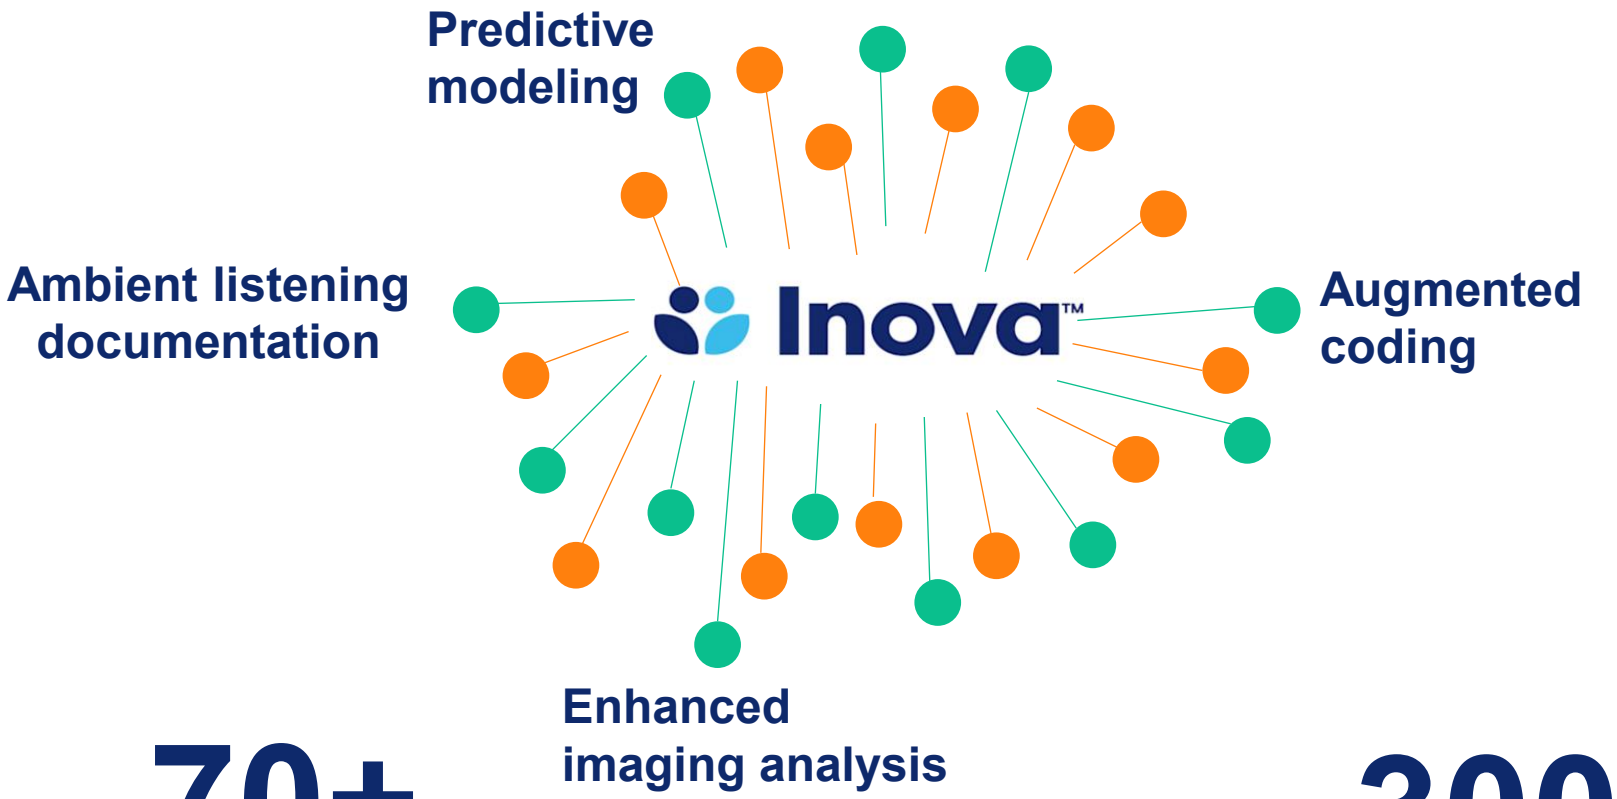
Leveraging AI for patients & providers

AI Is Here at Inova



70+

AI/ML tools are operational*

300+

have been considered

*Operational = deployed in real workflows with real patients, clinicians, or financial impact

The greatest opportunity offered by AI is not reducing errors or workloads, or even curing cancer: It is the opportunity to restore the precious and time-honored connection and trust – the human touch – between patients and doctors.

Deep Medicine
