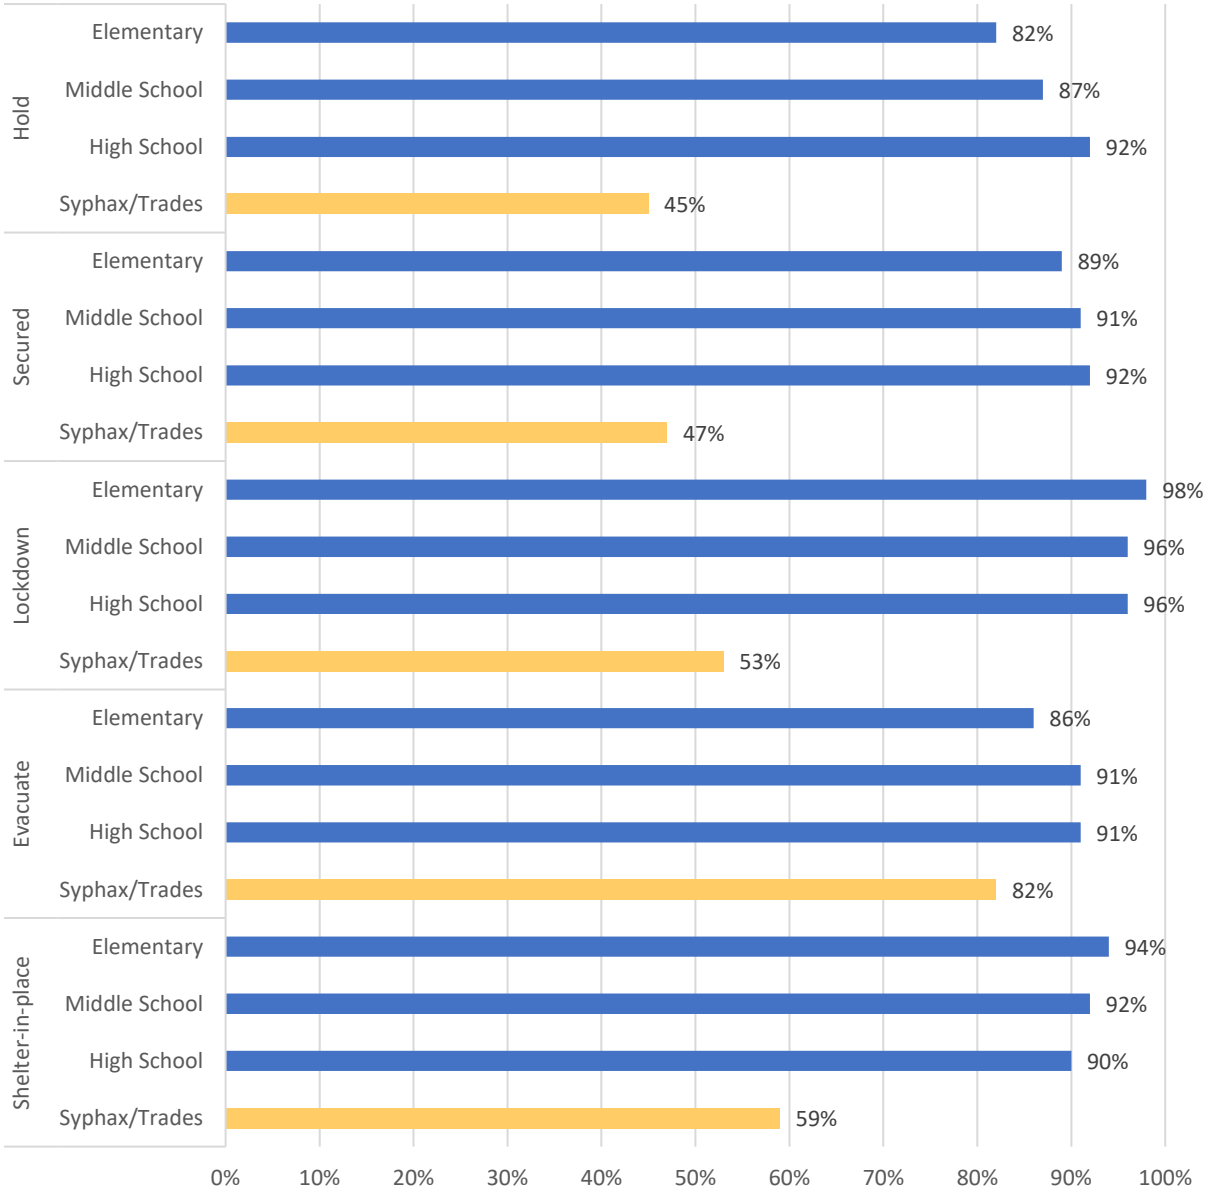
Perceptions of effective technology and infrastructure	X	X
Knowledge of emergency procedures for students with physical disabilities	X	X
Knowledge and understanding of Safety Security Coordinators	X	

Staff Online Health and Safety Compliance Training and Site-specific training

- Most staff (88%) indicate that they have completed the online health and safety compliance training.
- Of those who did not complete the training, 40% of respondents indicate that they were not aware that there was a training.
- Thirty-four percent of staff received site-specific training this year or in the 24-25 school year.
- Forty percent of respondents were not sure if they had ever received site-specific training.

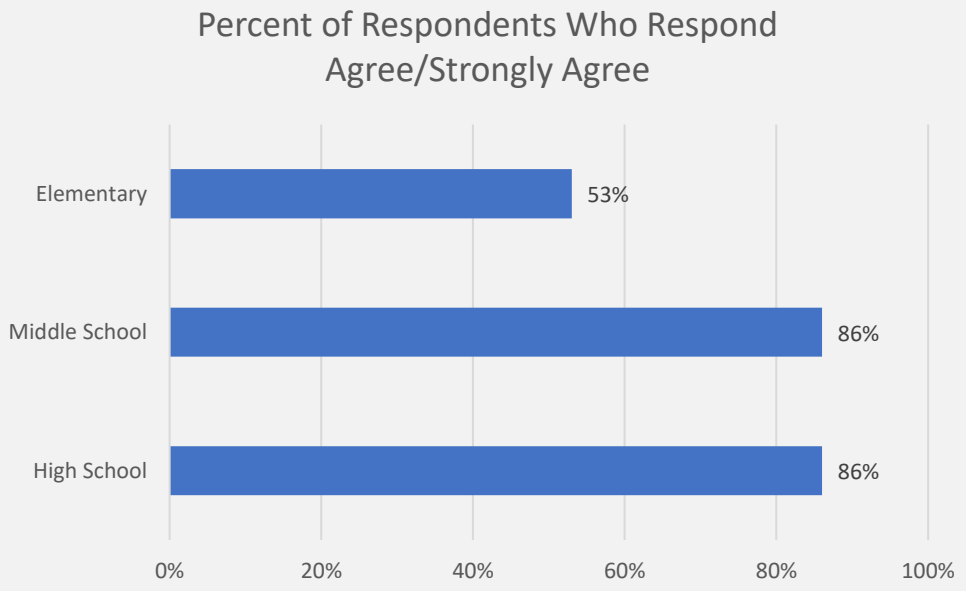
Staff Knowledge of Emergency Procedures



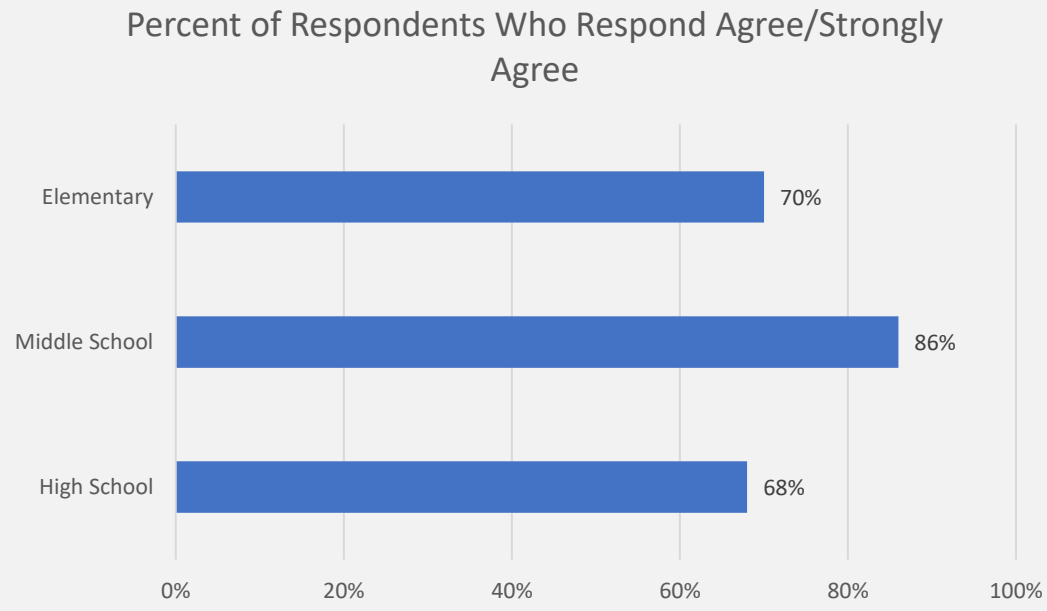
- **Staff at school indicate a high understanding (over 80%) of all Emergency Procedures.**
- **School staff have the highest level of understanding for lockdown procedures.**
- **Over 80% of all staff indicate an understanding of evacuation procedures.**
- **Substantially less staff at Syphax/Trades compared to school staff understand procedures holds, buildings being secured, lockdowns and shelter-in-place.**
- **Over 80% of school staff feel that APS developed effective emergency procedures, compared to 53% of staff at Syphax and Trades.**
- **When asked about additional supports, 67% of staff at Syphax/Trades note the need for additional training.**

School Staff Findings

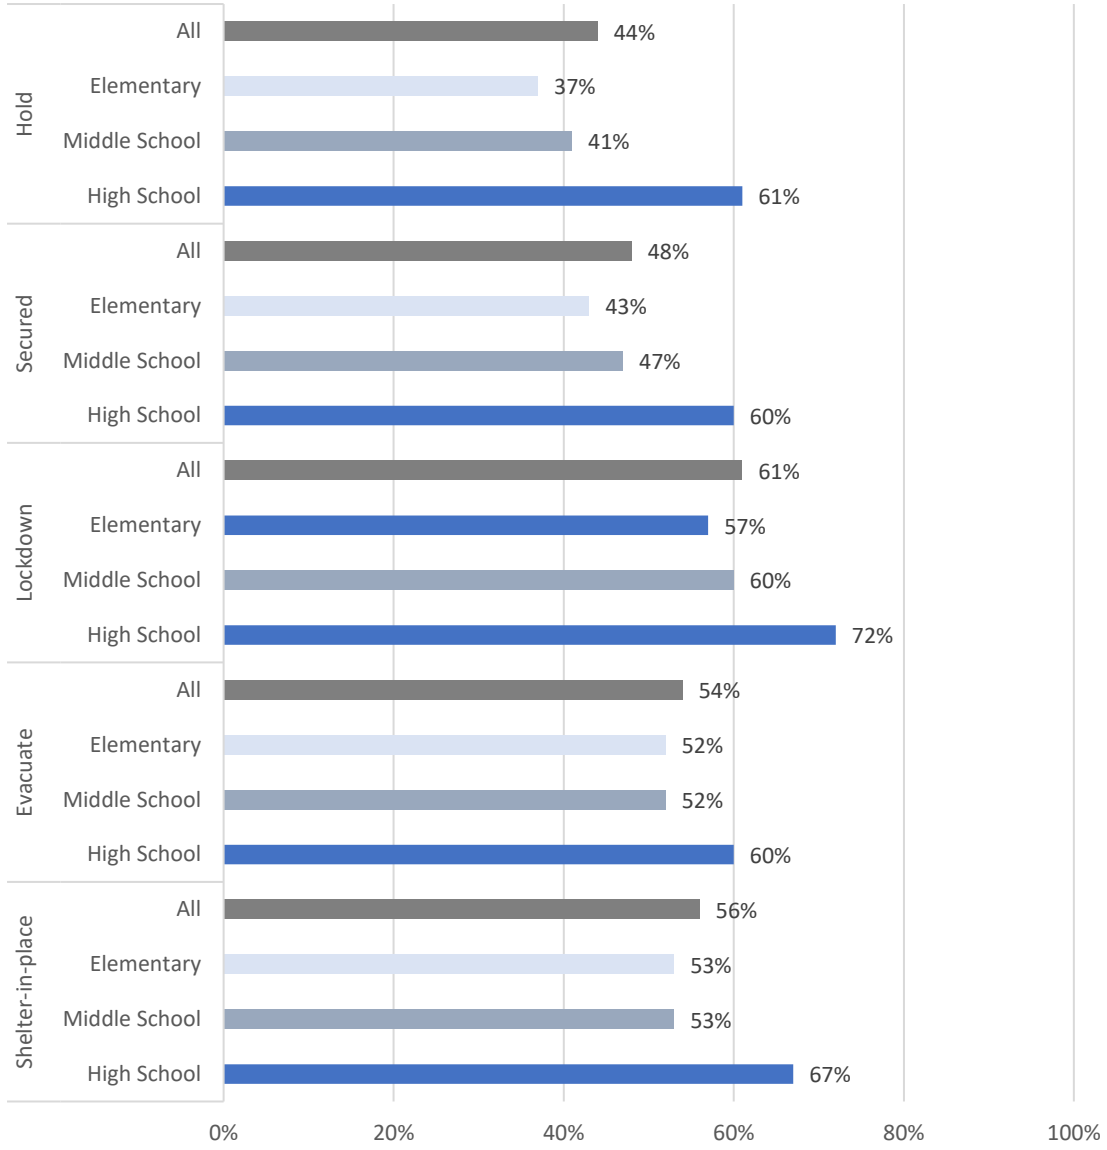
Eighty-six percent of Middle School and High School staff know their School Security Coordinator compared to 53% for staff at the Elementary level.



Although 86% of Middle School staff indicate that they know the proper emergency procedures for students with disabilities this percentage decreased to for Elementary (70%) and High School staff (68%).



Family Knowledge of Emergency Procedures Results



- **Families across grade levels report an understanding ranging from 44% to 60% for specific safety procedures.**
- **Disaggregated data shows that high school families have a higher understanding compared to middle school and elementary families.**
- **Across all levels families understand lockdown procedures better than other safety procedures.**
- **Seventy percent of families do not know the procedures used during an emergency for students with disabilities.**

Family Survey Results

- Over 80% of families at all levels know when emergency drills occur at their student's schools.
- More than three-quarters of families know how information is shared when an emergency is taking place.

Despite a gap in understanding specific procedures, 81% of families agree that APS has developed effective emergency procedures.
