LinkedIn

Follow our official Fairfax County Government LinkedIn page to stay updated on local information and resources available to job seekers and others impacted by federal workforce actions.

Additionally, Fairfax County Public Library offers the LinkedIn Learning platform to residents with a library card.

Federal Workers Return to Office

As federal agency and military installation employees increase their in-office work, the county is expanding its programs to provide comprehensive commuting solutions for workers in the region.

Potential Federal Government Shutdowns

Our Health and Human Services system implements a coordinated response plan for significant events like a federal shutdown to assess the impact on federal service delivery to residents. County agencies will engage community providers in this effort to ensure resources are available, especially to vulnerable residents.

In addition to the impact on federally funded programs, county residents who work for federal agencies or contractors may need help with basic needs or experience hardships in paying county program fees or taxes. Residents who work in the service industry may also experience economic hardships.

FAIRFAX COUNTY, Va. (DC News Now) — Fairfax County is offering help for federal workers who have been affected by the firings and layoffs.

As the Trump administration continues to shrink the federal workforce, the county has a multitude of services and resources available to former federal employees and contractors.
