Department	Information Technology
Description of Need	An Integratable Learning Management System (ILMS) is crucial for a large and diverse school district like FCPS as it provides a centralized platform to deliver and manage educational content for a wide range of users, including students, faculty, and parents. Such a system streamlines the delivery of instruction, facilitates communication, and supports personalized learning experiences. It also enables efficient assessment, reporting, and management of learning resources through a Learning Objects Repository. The ILMS allows FCPS to effectively serve its diverse community and ensure consistent, high-quality education across all levels.
Background Information	**Integrated System Component:** **Instructional Learning Management System (ILMS):** FCPS was using Blackboard as the LMS since 2001, but needed to upgrade to an improved similarly functioning LMS that provides support for in-person, online and blended learning with functionality that includes Course Management, Curriculum Management, Communication and Collaboration, Assessment, Student Portfolio, and Collaborative Work Space, parent access, and reporting and systems administration tools. The new LMS was required to include the import of existing Blackboard course content for teachers who wish to reuse their existing Blackboard course materials. **Assessment Management Platform (AMP / Performance Matters):** **Online and paper/pencil Assessment system.** FCPS previously used an Assessment System developed jointly with Northrop Grumman. The ability for existing Assessment items, assessments, and structured learning objectives content to be imported into the ILMS, Schoology. Schoology was acquired by Powerschool in 2020 and codified in Amendment 1. The acquisition also necessitated a product name change from AMP to Performance Matters as codified in Amendment 4. Performance Matters includes PM Assessment, PM Progress Monitoring, PM Early Warning System, PM Analytics and PM (Response to Intervention & Multi-Tiered System of Supports) RTI/MTSS. **Learning Object Repository and Search Engine (LOR):** FCPS has been using a LOR system developed jointly with Northrop Grumman as the LOR system, but needed to upgrade to an improved similarly functioning system with the ability for existing resources and structured learning objectives to be imported into the new systems and include customization, integration, data conversion, training, and support. **Connected Intelligence Data-as-a-Service:** Is a data management tool added to the contract with Amendment 6 in 2023.

Amendment Detail	
Description of Contract Change	This amendment is to renew the contract for three years, update the pricing summary, update the supplier information and add the Digital Accessibility Requirements clause to the contract.
Annual Value of Change	$1,693,247
Total Contract Value of Change	$5,079,742
