III. PHILOSOPHY

The Fairfax County School Board recognizes its responsibility as a steward of public funds and is committed to a procurement system that promotes fiscal responsibility, transparency, fairness, accountability, and complies with all applicable laws and regulations. The responsible procurement of goods and services is essential to supporting the education mission and daily operations of FCPS.

The School Board supports the use of procurement practices that encourage competition, seek the best value for the school division, and provide equal opportunity for qualified vendors. Sole-source contracts are not preferred when multiple vendors are available as competition promotes better quality and lower costs.

The School Board expects procurement decisions to be guided by legal and ethical standards and made in the best interest of the school division, its students, and the community it serves. Where cooperative procurement or similar contractual arrangements are utilized, the School Board expects the solicitation of offers from multiple vendors, to the greatest extent practicable, to achieve maximum return on investment.
